

## Immunisations

During their time at school, children will be offered the following immunisations -

Years 1, 2 & 3	Flu vaccine (given as a nasal spray)
Year 8	HPV vaccine (2 injections given at least 6 months apart)
Year 9	3-in-1 teenage booster (tetanus, diphtheria, polio)
Year 9	Meningitis ACWY

Although the School Nurses will organise these vaccinations, they will be administered by external agencies appointed by NHS Haringey / Camden.

It is essential that students / parents keep their own records of the vaccinations they have been given as the school will not have them, and they will be needed for University / future travel.
