

## **FOUNDATIONS FOR THE FUTURE**

Channing has invested heavily over the past 10 years in improving the School's facilities. It finds itself today as one of the leading Independent Day Schools for girls in the country.

This has in the main been a result of the generosity shown by Channing Old Girls, Parents and Friends of the School, as well as shrewd financial management. Channing, like many other Independent Schools, is not well-endowed, but we still aim to expand upon and upgrade our excellent facilities in addition to increasing our scholarship and bursary provision for the future.

The role for the Development Office is to accelerate the building programme at Channing and to substantially increase the funds available for projects alongside Bursaries.

The School has a formal development plan which is agreed by the School Governors. We also have a Development Board which gives guidance and support to the School on how to take forward the future agenda.

Just like the rest of the School, we have set ourselves high targets and challenges and wish to raise fund of £3million in support of the School's Capital Challenge Appeal alongside funds for Bursaries.

We hope that the Channing family will continue with their support for Channing thus ensuring that the School is a foundation of educational excellence for future generations.
